## Professional Summary

Front-end Developer with 7+ years' experience specialising in building scalable React & NodeJS applications. Strong background in UI engineering, performance optimization, and cross-team collaboration with global clients including Apple, Wells Fargo, etc.

## Education

**SAN JOSE STATE UNIVERSITY (SJSU) | SAN JOSE, CA, USA**  
**MS in Software Engineering | [JAN 2014 - DEC 2015]**  
**AHMEDABAD INSTITUTE OF TECHNOLOGY | AHMEDABAD, GJ**  
**BE in Computer Engineering | [JUN 2009 - JUL 2013]**  
-----  
**CAMPBELLSVILLE UNIVERSITY | LOUISVILLE, KY, USA**  
**MBA Coursework in Business Strategy & Technology (2019)**

## Work Experience

### FRONT-END REACT DEVELOPER | APPLE INC

**Remote, Ahmedabad, India | [SEP 2022 - DEC 2024]**

- Consulted via Infosys & led the development and management of the UI (React) for Starling platform, collaborating with the Team Lead, Product Manager, backend team, and UX team to deliver high-quality features and revamp the application.
- Worked with the architecture and infrastructure teams to optimize seed-list and governance email features, reduce React build time by 60%, and ensure smooth production deployments.
- Partnered with the data and QA teams to establish data-binding contracts, resolve issues, and maintain application stability through continuous bug fixes and enhancements.

**Took short medical leave in (Mar'22-Sep'22) for wrist surgery** – fully recovered.

### SR. SOFTWARE ENGINEER | AMNGO INC

**Ahmedabad, Gujarat, India | [DEC 2019 - MAR 2022]**

- Collaborated with UX/UI designers to build accessible and responsive web applications, reducing reported UI defects by 40%.
- Led end-to-end development of the Community Care Behavioural Health (CCBH) platform built on React, Redux(saga) and Node-Express-Mongo backend.
- Worked as Senior Front End (React Consultant) @LeapToDigital (MD,USA) in building sales CRM using React, Node, TypeScript, ParseDB, RxJS.

### FRONT END APPLICATION DEVELOPER | INTERN | OCHAIN LLC

**San Jose, California, USA | [SEP 2018 - FEB 2019]**

- Worked on transitioning Meteor-blaze application into React-redux application with using Redux-Saga as an async middleware.
- Designed and developed several React and React Native components as Spinner, slider, data storage, block stat and chain stats.
- Worked on developing Merkle tree for transaction verification in React, along with implementing a few components like mnemonic phrase verification to get hands on React-native.
- Wrote several queries using Dexie.js for performing CRUD operations to query IndexedDB for OChain wallet, transactions and stats.

### UI DEVELOPER | PROTEK CONSULTING

**San Jose, California, USA | [SEP 2016 - JUN 2018]**

- Worked as a UI Consultant for GE Digital and Wells Fargo, delivering high-quality user interfaces in a Scrum-based environment
- My roles involved developing reusable components, implementing new features, and maintaining UI consistency using Polymer, YUI and React.
- Other duties included refactoring and modernizing codebases for better scalability, identified and fixed UI defects to ensure a smooth user experience, collaborating with designers and backend teams to ensure seamless integrations.
- Completed 7 months of freelance React/Gatsby work (**Feb 2025 - Sep 2025**) at a local design firm (Croquis), upgrading the website, reducing load times, and delivering modern UI enhancements across key pages.
- Advanced training in Next.js, Front End System Design, React (v18), and Data Structures & Algorithms (Sep 2025 – Present)

## Professional Development

## Tech Stack

- Frontend:** React, Next.js, Redux-Saga, Redux Toolkit, Gatsby, Tailwind, Material UI, CSS/SCSS, Bootstrap, HTML5, TypeScript
- Backend & Databases:** Node.js, Express, MongoDB, Redis, MySQL.
