## PERSONAL PROFILE

Front end developer with strong development, analytical, troubleshooting and communication skills. Proficient at designing and writing code in various languages, feature development and implementation.

## EDUCATION HISTORY

**SAN JOSE STATE UNIVERSITY (SJSU)  |  SAN JOSE, CA**
MS in Software Engineering | [2014-2015]

**AHMEDABAD INSTITUTE OF TECHNOLOGY  | AHMEDABAD, GJ**
BE in Computer Engineering | [2009-2013]

## EXPERIENCE

**SR. SOFTWARE ENGINEER  |  AMNGO INC**
Ahmedabad, Gujarat, India  |  [DEC'19-PRESENT]

- Working closely with UX/UI designer to develop static websites using HTML5, CSS3, SASS, JS, etc.
- Currently responsible for handling entire end-to-end Community Care Behavioural Health(CCBH) project build on React, Redux(saga) and Node-Express-Mongo backend.
- Currently working as Senior Front End (React Consultant) @LeapToDigital (MD,USA) in building sales CRM using React, Typescript, ParseDB, RxJS.

**FRONT END DEVELOPER | 0CHAIN LLC**
San Jose, California, USA  |  [SEP'18-MAY'19]

- Worked on transitioning Meteor-blaze application into React-redux application with using redux-saga as an async middleware.
- Designed and developed several reactjs and react-native components as Spinner, slider, data storage, block stat and chain stats.
- Worked on developing Merkel tree for transaction verification in react, along with implementing few components like mnemonic phrase verification to get hands on react-native.
- Wrote several queries using Dexie.js for performing crud operations to query IndexedDB for 0Chain wallet, transactions and stats.

**UI DEVELOPER  |  WELLS FARGO BANK**
San Francisco, California, USA  |  [SEP'17-AUG'18]

- Designed and developed foreign exchange panel, multiple templated payment module within the Wires application team on Wells Fargo CEO portal.
- Helped in kickstarting the conversion of the entire portal from YUI to React-redux application. Optimized and fixed several defects based on template group and reports module.

**UI DEVELOPER | AVITAS SYSTEMS (GE VENTURE)**
San Ramon, California, USA  |  [FEB'17-AUG'17]

- Worked on creating an inspection platform for oil & gas and rails assets inspection using Polymer and Node.js.
- Developed different micro applications for the inspection service along with building several Angular and polymer components and rendered it on GE's app-hub platform
